

# Orwell's law

zlo

# Who are we

- DBAS - “Digitální bezpečnost a soukromí”
- A newly-formed initiative
- Digital security AND privacy
- We want both!

# Current situation in Czech Republic

- Censorship law passed
- LEA need court orders to spy
- Secret services are somewhat restrained

# DEFEND THE CYBER!!11one!

- NATO: “cyber is the fifth warfare domain”
- Amendment of secret service law
- Push for a broader surveillance network
- Essentially “ISPs have to put our blackboxes into their networks wherever we please”
- Gag orders for ISPs and their employees
- Huge penalties for breaking gag orders

# A lot of shady stuff

- Law coming from morally questionable people
- Army secret service was abused just two years ago
- Minister who co-drafted the law is openly lying and/or doesn't know what the law says
- No oversight whatsoever
- No way to legally challenge the blackboxes
